Open Autocad and navigate to the menu. Once on the menu, select Autocad > Options > System. Then in the system options check the Enable Autocad for "Microsoft Windows" – Checked. Under the System Options > Help, find Autocad Help Support and select the arrow next to it and select Open C:\Program Files\Autodesk\AutoCAD 2017\Help Support. This is a Help file for Autocad 2017. If you don't have Autocad opened on your computer, run the autocad.exe. When the autocad.exe opens click on the File > Save As… menu. Navigate to the Autodesk Autocad location and save the autocad.xml file to this location. Right click on the autocad.xml file and select Open with notepad. Copy the following key in the xml file into a new line under the entity tags. true This is the key. When you close notepad, close the autocad.exe and exit. Now you should see the option for Autocad for "Microsoft Windows" in the system options. Note: It's not necessary to enable Autocad for "Microsoft Windows" in the system options, but this will make it easier to remove the autocad.xml file and remove the icon from the system tray To uninstall Autocad: If you still have Autocad open on your computer, go to the menu and select Autocad > Exit. To remove the icon from the system tray: Go to Start > Control Panel > Add Remove Programs. In the list of programs, search for "Autocad". Right click and select Remove. Your Autocad should be removed now. To create a shortcut on your desktop: Right click on your desktop, select New > Shortcut. Navigate to the Autocad folder, select the autocad.xml file, and click OK. That's it. Now you can double-click the shortcut on your desktop to open Autocad. NOTE: You will not be prompted to install the Autocad trial
